MAIN PRINCIPLES OF THE OPEN DIALOGUE TREATMENT
The Western Lapland idea
J. Aaltonen, B. Alakare & J. Seikkula

PRINCIPLES
■ IMMEDIATE HELP
■ SOCIAL NETWORK PERSPECTIVE
■ FLEXIBILITY AND MOBILITY
■ RESPONSIBILITY
■ PSYCHOLOGICAL CONTINUITY
■ TOLERANCE OF UNCERTAINTY
■ DIALOGISM

IMMEDIATE HELP
■ First meeting in 24 hours
■ Crisis service for 24 hours
■ All participate from the outset
■ Psychotic stories are discussed in open dialogue with everyone present
■ The patient reaches something of the "not-yet-said"

SOCIAL NETWORK PERSPECTIVE
■ Those who define the problem should be included into the treatment process
■ A joint discussion and decision on who knows about the problem, who could help and who should be invited into the treatment meeting
■ Family, relatives, friends, fellow workers and other authorities

FLEXIBILITY AND MOBILITY
■ The response is need-adapted to fit the special and changing needs of every patient and their social network
■ The place for the meeting is jointly decided
■ From institutions to homes, to working places, to schools, to polyclinics etc.

RESPONSIBILITY
■ The one who is first contacted is responsible for arranging the first meeting
■ The team takes charge of the whole process regardless of the place of the treatment
■ All issues are openly discussed between the doctor in charge and the team

PSYCHOLOGICAL CONTINUITY
■ An integrated team, including both outpatient and inpatient staff, is formed
■ The meetings as often as needed
■ The meetings for as long period as needed
■ The same team both in the hospital and in the outpatient setting
■ In the next crisis the core of the same team
■ Not to refer to another place
TOLERANCE OF UNCERTAINTY
- To build up a scene for a safe enough process
- To promote the psychological resources of the patient and those nearest him/her
- To avoid premature decisions and treatment plans
- To define open

DIALOGISM
- The emphasize in generating dialogue - not primarily in promoting change in the patient or in the family
- New words and joint language for the experiences, which do not yet have words or language
- Listen to what the people say not to what they mean

MAIN ELEMENTS OF OPEN DIALOGUE © Jaakko Seikkula
- Everyone participates from the outset in the meeting
- All things associated with analyzing the problems, planning the treatment and decision making are discussed openly while everyone present
- Themes for dialogue are not planned in advance
- Form of dialogue is not planned in advance
- Meeting can be conducted by one therapist or the entire team can participate in interviewing
- The primary aim in the meetings is not an intervention changing the family or the patient
- The aim is to build up a new joint language for those experiences, which do not yet have words
- Professionals discuss openly of their own observations while the network is present
- There is no specific reflective team, but the reflective conversation is taking place by changing positions from interviewing to having a dialogue
- In the conversation the team tries to follow the words and language used by the network members instead of finding explanations behind the obvious behavior
- Uncertainty is tolerated and immature and rapid conclusions and decisions are avoided
